

Mission and Objectives

Primary Mission: Create the Sector

Defend the interests of the high-performance floors and coatings.

To study technical issues inherent to high-performance floors and coatings for the public interest, technological progress and the growth of the sector.

To disclose among the members and users in general, standards, procedures and techniques to be observed in the uses and applications of high-performance floors and coatings.

To stimulate and ensure ethical relationship between its members and with third parties.

To identify, research and promote among their associates, new markets for the implementation of systems for high-performance floors and coatings and other areas and activities that complement and/or have interface with the work of floor systems.

To encourage the members and users in general the adoption of projects of high-performance floors and coatings, drawn up in accordance with the norms of ABNT-Brazilian Association for Technical Standards, stimulating the use of standardized materials and systems.

Keep exchange with similar national and international entities.

To group members in Sectors Chambers, as their interests and affinities;

To promote the creation of regional clusters aiming at national representativeness of the sector.
